Montreal, QC | 514-953-8977 | cchhunsteven@gmail.com | github.com/St-vn | st-vn.github.io/portfolio/

EDUCATION

Concordia University

Bachelor of Computer Science

Montreal, QC

2026 – 2029

Collège Lionel-Groulx

Diploma of College Studies in Pure and Applied Science

Sainte-Thérèse, QC

2023 – 2026

EXPERIENCE

Full-Stack Game Developer

Freelancing/Contracts

2020 – Present

Remote

- Contributed to **5+** **front-page** game studios on Roblox
- Optimized multiplayer experiences using client-side prediction, server-side reconciliation and anti-cheat
- Designed gameplay visuals with cutscenes, particles, anime-styled combats and UI/HUD systems
- Developed shadow table based server-client state replication middleware for simplifying server-client state tracking
- Engineered game mechanics using FABRIK, Swept OBB collision, A*/Dijkstra Pathfinding, etc.

Frontend Developer

Oakley Productions LLC

2024

Remote

- Contributed to **Anime Defenders** game with 3.4B+ visits peaking at 375K+ concurrent users
- Developed abilities for **10+ characters** using particles, trails effects, sound effects and animations
- Engineered visual effects utilizing particle engines, custom projectile motion vectors and bezier paths
- Programmed custom programmatic Rock visual effects leveraging easing vector math and 3D parts

PROJECTS

aede | *Python, TypeScript, FastAPI, React, Next.js, Docker*

June 2026 – July 2026

- Engineered a 14,700+ line Python agent harness supporting 10 distinct tools and 6+ model providers
- Hardened execution using Docker sandboxing, prompt injection filtering and secret redaction
- Extended agent capabilities via ACP agent orchestration, MCP server integrations, skills and plugins
- Identified and remediated 11+ security vulnerabilities using STRIDE threat modeling
- Maintained 155+ tests including 19 security tests validating remediations
- Optimized LLM costs via context compaction with hybrid FTS5 and embeddings memory retrieval

HackTheMountain 2026 | *Python, TypeScript, Expo, React Native, OpenRouter*

2026

- Designed and pitched the mobile application solo
- Integrated the Shazam REST API via RapidAPI for real-time audio identification
- Used Expo native sub-libraries for audio recording and haptic vibrations
- Conducted analysis of track audio using FreqBlog (BPM, energy, danceability, mood, etc.)
- Developed matchmaking based on users' profile using cosine similarity
- Searched charting tracks and their metadata via Kwordb and iTunes Search API

TECHNICAL SKILLS

Languages: Python, C#, SQL (Postgres + SQLite), TypeScript, JavaScript, Lua/LuaU, HTML/CSS

Frameworks: React, FastAPI, Next.js, React Native, Expo

Developer Tools: Git, Docker, GitHub, Vercel, Railway, Expo, Supabase, Redis, VS Code, Visual Studio, Unity, Roblox Studio
