

Chhun Steven Chhay

Montreal QC | 514-953-8977

cchhunsteven@gmail.com | <https://st-vn.github.io/portfolio/>

Education

Concordia University (2026 - 2030)

- Bachelor of Engineering in Computer Engineering

Collège Lionel-Groulx (2023 - 2026)

- Diploma of College Studies in Pure and Applied

Experience

Full-Stack and Lead Developer (2025 - now)

Magicbox Logistics LLC

- Communication with manager to create technical plans
- Statistical modeling to estimate product sales and trend velocity
- Usage of databases to store trending products
- Used workflow automation tools

Full-Stack Developer (2024)

Boss Studios LLC

- Developed a Minecraft BedWars styled game
- PvP combat, building systems, projectiles, melees, inventory systems
- Lobby systems

Frontend Developer (2024)

Oakley Productions LLC

- Project currently generates +3.4B total visits and peaked at 100K concurrent users
- Contributions to "Anime Defenders", a tower defense game
- Scripted over 10 units/characters and 30 abilities total
- Engineered scalable visuals effects using visual frameworks(particles, projectile motion and bezier curves)

Full-Stack Game Developer (2020 - now)

Freelancer/Contractor

- Applied mathematics(matrices, vectors, IK, intersection math, etc.)
- Applied physics(kinematics, projectile motion, springs, light reflection, momentum, etc.)
- Networking, animations, visual effects, UI/HUD, AI pathfinding, data storage and more

Projects

HackTheMountain Hackathon (2026) | Python, TypeScript, Expo, React Native, OpenRouter

Polytechnique Montreal

- Designed, developed and pitched the mobile application solo
- Integrated the Shazam REST API via RapidAPI for real-time audio identification
- Used Expo native sub-libraries for audio recording and haptic vibrations
- Rigorous analysis of track audio using FreqBlog(BPM, energy, danceability, mood, etc.)
- Gemini Flash via OpenRouter to synthesize qualitative data and create original profiles

- Searched charting tracks and their metadata via Kwordb and iTunes Search API

levlrai (2026) | TypeScript, Next.js, Supabase, Stripe, Redis, Vite, Tailwind

- Architected an AI-powered study platform that parses course documents(Mammoth + PDF Parse) and clean LaTeX rendering(Katex)
- Engineered a secure data layer built on PostgreSQL and Google OAuth via Supabase, paired with Upstash Redis to manage caching, token usage and enforce rate limits
- Integrated Stripe API for end-to-end subscription based payment
- Maintained high code reliability through CI testing via Playwright and Vitest for component verification

CEGEP Integrative Project (2026) | Fusion360

Collège Lionel-Groulx

- Designed an H-Rotor vertical wind turbine using CAD
- Used brushed DC Motor to create DC voltage
- Applied electromagnetism : KVL, Faraday's law, induced current, cogging torque
- Applied mechanical engineering : aerodynamics, airfoil design, gear size ratio, betz's limit

"Déplace de l'air" Contest (2026)

Polytechnique Montreal

- Lead a team of 3 for the wind turbine contest
- Research on blade aerodynamics, alternator designs and other turbine physics
- Brainstorming and experimentation with teammates
- Planning constraints, tradeoffs, meetings and testing

CFD Simulation (2026)

- Programmed "Computational Fluid Dynamics" within game engine constraints
- Steering algorithm inspired from boids and pressure forces to simulate particle trajectory
- Bernoulli's principle for velocity and pressure relationship

Game development/Programming mentor (2023 - now)

- Guided/tutored multiple peers in programming courses
- Mentored a senior student for their Unity integrative project in 200.C1(2025)
- Taught various game development concepts to students(FABRIK Inversed Kinematics, A* Pathfinding, Projectile Motion, Collider Logic, Debouncing, etc.)

Extracurriculars

Open House Volunteering (2025)

Collège Lionel-Groulx

- Volunteered as pure and applied program guide and guided visitors around campus and labs
- Answered program inquiries regarding program courses and workload
- Gave students advice for studying and time management
- Encouraged STEM and reassured students based on program difficulty

Technical Skills

-
- **Languages:** C#, Python, JavaScript, TypeScript, Lua, SQL(Postgres+ SQLite), HTML/CSS
 - **Tooling:** Git, GitHub, Vercel, Railway, Expo, Supabase, Redis, Visual Studio Code, Vite, Visual Studio Community, Fusion360, Unity, Blender, Roblox Studio
 - **Frameworks:** React, FastAPI, Next.js, Playwright, Vitest, React Native, Tailwind
 - **AI Tooling:** Claude Code, Antigravity, Hermes, Gemini CLI, OpenCode, Goose
 - **Libraries:** PyTrends, NumPy, Matplotlib, Mammoth, PDF Parse
