

Chhun Steven Chhay

Montreal, QC | 514-953-8977 | cchhunsteven@gmail.com | github.com/St-vn | st-vn.github.io/portfolio/

EDUCATION

Concordia University

Bachelor of Engineering in Computer Engineering

Montreal, QC

2026 – 2030

Collège Lionel-Groulx

Diploma of College Studies in Pure and Applied Science

Sainte-Thérèse, QC

2023 – 2026

EXPERIENCE

Full-Stack Developer

Boss Studios LLC

2024

Remote

- Developed a Minecraft BedWars-styled game with full gameplay mechanics
- Programmed PvP combat, building systems, projectiles, melee attacks, and inventory systems
- Implemented lobby systems and multiplayer infrastructure

Frontend Developer

Oakley Productions LLC

2024

Remote

- Contributed to “Anime Defenders”, a tower defense game on Roblox with +3.4B total visits and 100K peak concurrent users
- Developed gameplay scripting for over 10 units/characters and 30 abilities total
- Engineered scalable visual effects using frameworks for particles, projectile motion, and Bézier curves

Full-Stack Game Developer

Freelancer/Contractor

2020 – Present

Remote

- Applied mathematics (matrices, vectors, inverse kinematics, intersection math, etc.) to game mechanics
- Applied physics (kinematics, projectile motion, springs, light reflection, momentum, etc.) for realistic simulations
- Developed networking systems, custom animations, visual effects, UI/HUD, AI pathfinding, and data storage solutions

PROJECTS

HackTheMountain Hackathon (vibe-fm) | *Python, TypeScript, Expo, React Native, OpenRouter*

2026

- Designed, developed, and pitched the mobile application solo at Polytechnique Montreal
- Integrated the Shazam REST API via RapidAPI for real-time audio identification
- Used Expo native sub-libraries for audio recording and haptic vibrations
- Conducted rigorous analysis of track audio using FreqBlog (BPM, energy, danceability, mood, etc.)
- Utilized Gemini Flash via OpenRouter to synthesize qualitative data and create original user profiles

CFD Simulation | *Physics Simulation, Game Engine, C#*

2026

- Programmed “Computational Fluid Dynamics” (CFD) within game engine constraints
- Implemented a steering algorithm inspired by boids and pressure forces to simulate particle trajectories
- Applied Bernoulli’s principle to model real-time velocity and pressure relationships

EXTRACURRICULARS

Game Development & Programming Mentor

Peer Tutoring / Mentoring

2023 – Present

Remote

- Guided and tutored multiple peers in computer programming courses
- Mentored a senior student for their Unity integrative project in 200.C1 (2025)
- Taught game development concepts including FABRIK Inverse Kinematics, A* Pathfinding, projectile motion, collider logic, and debouncing

Open House Volunteer

Sainte-Thérèse, QC

Collège Lionel-Groulx

2025

- Volunteered as a Pure and Applied Science program guide, directing visitors around campus and labs
- Answered program inquiries regarding courses, academic workload, and expectations

TECHNICAL SKILLS

Languages: C#, Lua, JavaScript, TypeScript, Python, SQL (Postgres + SQLite), HTML/CSS

Frameworks: React, FastAPI, Next.js, Playwright, Vitest, React Native, Tailwind

Developer Tools: Git, GitHub, Vercel, Railway, Expo, Supabase, Redis, VS Code, Visual Studio, Vite, Fusion360, Unity, Blender, Roblox Studio

AI Tooling: Claude Code, Antigravity, Hermes, Gemini CLI, OpenCode, Goose

Libraries: PyTrends, NumPy, Matplotlib, Mammoth, PDF Parse
