| <ul style="list-style-type: none"><li>Programmed “Computational Fluid Dynamics” (CFD) within game engine constraints</li><li>Implemented a steering algorithm inspired by boids and pressure forces to simulate particle trajectories</li><li>Applied Bernoulli’s principle to model real-time velocity and pressure relationships</li></ul>                                                                                                         |      |

## EXTRACURRICULARS

---

### Game Development & Programming Mentor

2023 – Present

*Peer Tutoring / Mentoring*

*Remote*

- Guided and tutored multiple peers in computer programming courses
- Mentored a senior student for their Unity integrative project in 200.C1 (2025)
- Taught game development concepts including FABRIK Inverse Kinematics, A\* Pathfinding, projectile motion, collider logic, and debouncing

### Open House Volunteer

Collège Lionel-Groulx

*Sainte-Thérèse, QC*

*2025*

- Volunteered as a Pure and Applied Science program guide, directing visitors around campus and labs
- Answered program inquiries regarding courses, academic workload, and expectations

## TECHNICAL SKILLS

---

**Languages:** C#, Python, JavaScript, TypeScript, Lua, SQL (Postgres + SQLite), HTML/CSS

**Frameworks:** React, FastAPI, Next.js, Playwright, Vitest, React Native, Tailwind

**Developer Tools:** Git, GitHub, Vercel, Railway, Expo, Supabase, Redis, VS Code, Visual Studio, Vite, Fusion360, Unity, Blender, Roblox Studio

**AI Tooling:** Claude Code, Antigravity, Hermes, Gemini CLI, OpenCode, Goose

**Libraries:** PyTrends, NumPy, Matplotlib, Mammoth, PDF Parse
