

Chhun Steven Chhay

Montreal, QC | 514-953-8977 | cchhunsteven@gmail.com | github.com/St-vn | st-vn.github.io/portfolio/

EDUCATION

Concordia University <i>Bachelor of Engineering in Computer Engineering</i>	Montreal, QC 2026 – 2030
Collège Lionel-Groulx <i>Diploma of College Studies in Pure and Applied Science</i>	Sainte-Thérèse, QC 2023 – 2026

EXPERIENCE

Full-Stack and Lead Developer <i>Magicbox Logistics LLC</i> - Communicate with manager to create technical plans and system design documents - Apply statistical modeling to estimate product sales, trend velocity, and volume - Design and implement robust databases to store and track trending products - Utilize workflow automation tools to optimize system efficiency and operations	2025 – Present <i>Remote</i>
Full-Stack Developer <i>Boss Studios LLC</i> - Developed a Minecraft BedWars-styled game with full gameplay mechanics - Programmed PvP combat, building systems, projectiles, melee attacks, and inventory systems - Implemented lobby systems and multiplayer infrastructure	2024 <i>Remote</i>
Frontend Developer <i>Oakley Productions LLC</i> - Contributed to “Anime Defenders”, a tower defense game on Roblox with +3.4B total visits and 100K peak concurrent users - Developed gameplay scripting for over 10 units/characters and 30 abilities total - Engineered scalable visual effects using frameworks for particles, projectile motion, and Bézier curves	2024 <i>Remote</i>
Full-Stack Game Developer <i>Freelancer/Contractor</i> - Applied mathematics (matrices, vectors, inverse kinematics, intersection math, etc.) to game mechanics - Applied physics (kinematics, projectile motion, springs, light reflection, momentum, etc.) for realistic simulations - Developed networking systems, custom animations, visual effects, UI/HUD, AI pathfinding, and data storage solutions	2020 – Present <i>Remote</i>

PROJECTS

HackTheMountain Hackathon (vibe-fm) <i>Python, TypeScript, Expo, React Native, OpenRouter</i> - Designed, developed, and pitched the mobile application solo at Polytechnique Montreal - Integrated the Shazam REST API via RapidAPI for real-time audio identification - Used Expo native sub-libraries for audio recording and haptic vibrations - Conducted rigorous analysis of track audio using FreqBlog (BPM, energy, danceability, mood, etc.) - Utilized Gemini Flash via OpenRouter to synthesize qualitative data and create original user profiles	2026
levlrai <i>TypeScript, Next.js, Supabase, Stripe, Redis, Vite, Tailwind</i> - Architected an AI-powered study platform that parses course documents (Mammoth + PDF Parse) with clean LaTeX rendering (KaTeX) - Engineered a secure data layer built on PostgreSQL and Google OAuth via Supabase, paired with Upstash Redis for caching, token management, and rate limiting - Integrated Stripe API for end-to-end subscription-based payments - Maintained high code reliability through CI testing using Playwright and Vitest for component verification	2026
CFD Simulation <i>Physics Simulation, Game Engine, C#</i> Programmed “Computational Fluid Dynamics” (CFD) within game engine constraints	2026

- Implemented a steering algorithm inspired by boids and pressure forces to simulate particle trajectories
- Applied Bernoulli's principle to model real-time velocity and pressure relationships

Market MCP Server (AI Hackfest Hackathon) | *Python, FastMCP, BeautifulSoup* 2026

- Created a Market Intelligence Model Context Protocol (MCP) server for AI agents to query live data from Roblox ecosystem wikis, Rolimons, and Cloud APIs
- Utilized FastMCP and BeautifulSoup4 to construct high-reliability parsing and data-gathering workflows

Job Scout (Testsprite Hackathon) | *React, Vite, FastAPI, Python, Vercel, Railway* 2026

- Led a three-person development team to create an AI job match tool utilizing Gemini resume parsing, SerpAPI job fetching, and automated cover letter generation
- Deployed frontend on Vercel using React and Vite, paired with a FastAPI backend hosted on Railway

EXTRACURRICULARS

Game Development & Programming Mentor 2023 – Present

Peer Tutoring / Mentoring

Remote

- Guided and tutored multiple peers in computer programming courses
- Mentored a senior student for their Unity integrative project in 200.C1 (2025)
- Taught game development concepts including FABRIK Inverse Kinematics, A* Pathfinding, projectile motion, collider logic, and debouncing

Open House Volunteer Collège Lionel-Groulx

Sainte-Thérèse, QC

2025

- Volunteered as a Pure and Applied Science program guide, directing visitors around campus and labs
- Answered program inquiries regarding courses, academic workload, and expectations

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, Lua, SQL (Postgres + SQLite), HTML/CSS

Frameworks: React, FastAPI, Next.js, Playwright, Vitest, React Native, Tailwind

Developer Tools: Git, GitHub, Vercel, Railway, Expo, Supabase, Redis, VS Code, Visual Studio, Vite, Fusion360, Unity, Blender, Roblox Studio

AI Tooling: Claude Code, Antigravity, Hermes, Gemini CLI, OpenCode, Goose

Libraries: PyTrends, NumPy, Matplotlib, Mammoth, PDF Parse
